

Reč urednika

Editor's note

Poštovane kolege, dragi saradnici,

Nikada raznovrsnija tematika radova, ovoga puta pred Vama u osmom broju časopisa „Medicinska reč“, pokazuje veliko interesovanje i angažovanje svih Vas u kreiranju časopisa.

Posle dve godine kontinuiranog izlaženja uredništvo „Medicinske reči“ će prema pravilima i ispunjenim kriterijumima aplicirati za kategorizaciju časopisa kod Ministarstva nauke, tehnološkog razvoja i inovacije Republike Srbije.

Veliko je zadovoljstvo i ponos svih nas koji smo učestvovali u stvaranju i promociji „Medicinske reči“, jer smo uspeli za ove dve godine da okupimo vrhunске domaće i evropske stručnjake iz oblasti različitih medicinskih grana. Uložili smo mnogo energije, truda i volje u poboljšanje kvaliteta stručnog rada, projekte, edukaciju, uvođenje novih tehnologija u svakodnevni rad, te je ovaj časopis upravo mogućnost da prikazemo rezultate ispitivanja i validacije novih metoda i tehnologija, ali i rutinske prakse koja se tokom proteklih godina intenzivno menjala, a prioritet nam je svima bio bezbedno i efikasno lečenje pacijenata. Sigurna sam da smo u tome i uspeli.

Svim kolegama i saradnicima želim uspešnu godinu, kako na ličnom, tako i na profesionalnom planu uz želju i nadu da sva Vaša kako sadašnja, tako i buduća naučna istraživanja budu u cilju poboljšanja dijagnostike i terapije za bolesnike. Nadam se da ćemo se u budućim vremenima razvijati još intenzivnije i da ćemo kroz „Medicinsku reč“ u godinama pred nama pratiti sve trendove i pravce razvoja stručne medicinske reči u svetu.

Prim. dr sc. med. Ana Antić,
glavni i odgovorni urednik

Dear colleagues and associates,

So far, the most diverse topic of the papers, this time in front of you in the eighth issue of the “Medical Word”, shows the great interest and engagement of all of you in creating the journal.

After two years of continuous publication, the editors of “Medical Word” will apply for the categorization of the journal at the Ministry of Science, Technological Development and Innovation of the Republic of Serbia, according to the rules and fulfilled criteria.

It is a great pleasure and pride for all of us who participated in the creation and promotion of “Medical Word” because, in these two years, we managed to gather top experts from the country and European experts in the field of various medical branches. We have invested a lot of energy, effort, and will in improving the quality of professional work, projects, and education, introducing new technologies into daily work. This journal is precisely the opportunity to present the results of testing and validation of new methods and technologies, as well as routine practices that have changed intensively throughout the years, and the priority for all of us was the safe and effective treatment of patients. I am sure that we succeeded in that.

I wish all my colleagues and associates a successful year, both personally and professionally, with the hope that all your current and future scientific research will be aimed at improving diagnostics and therapy for patients. I hope that in future times we will develop even more intensively and that through “Medical Word” we will follow all the trends and directions of development of professional medical remarks in the world in the years ahead.

Prim. Ana Antić, MD, PhD,
Editor-in-Chief
